Be Part of the New CTP 4 Online Testing

ERB is seeking your participation in a spring 2008 study to compare its online version of the CTP 4 with the paper and pencil test. By participating in the online testing, your school will benefit from immediate score reports and **save up to 20%** on basic scoring compared to the paper version.

Effective in spring of 2008, all CTP assessments will be available online as well as in the traditional paper version. The purpose of the study is to test the hypothesis that scores on the online assessments are comparable to scores on the paper assessments.

Once comparability is established, thousands of new items will be developed by member school teachers in June 2008, followed by subsequent field testing and eventual roll out of computer adaptive versions in 2009.

Be part of the future of assessment. Receive your scores quicker and get them at a lower cost!
